

SAMA Faculty Visiting Program

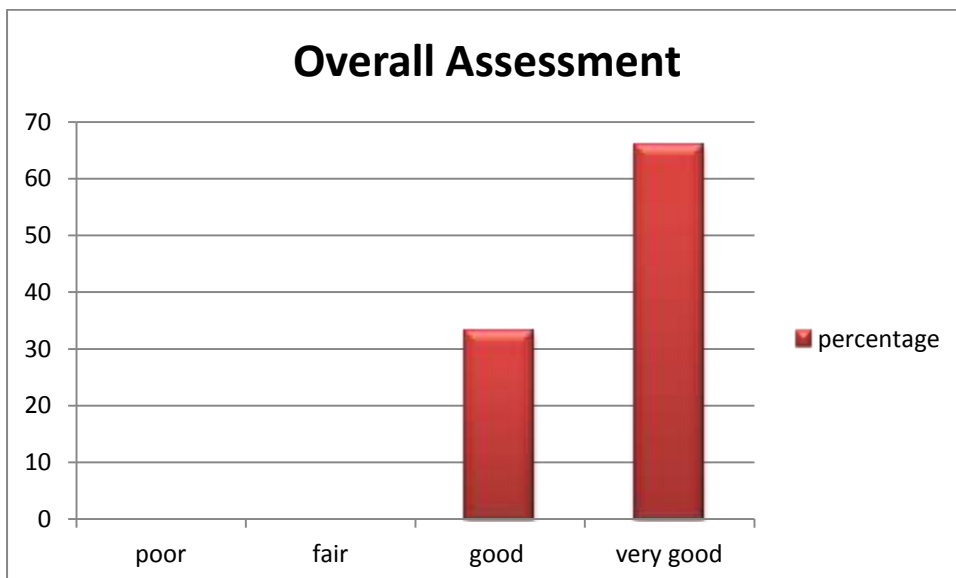

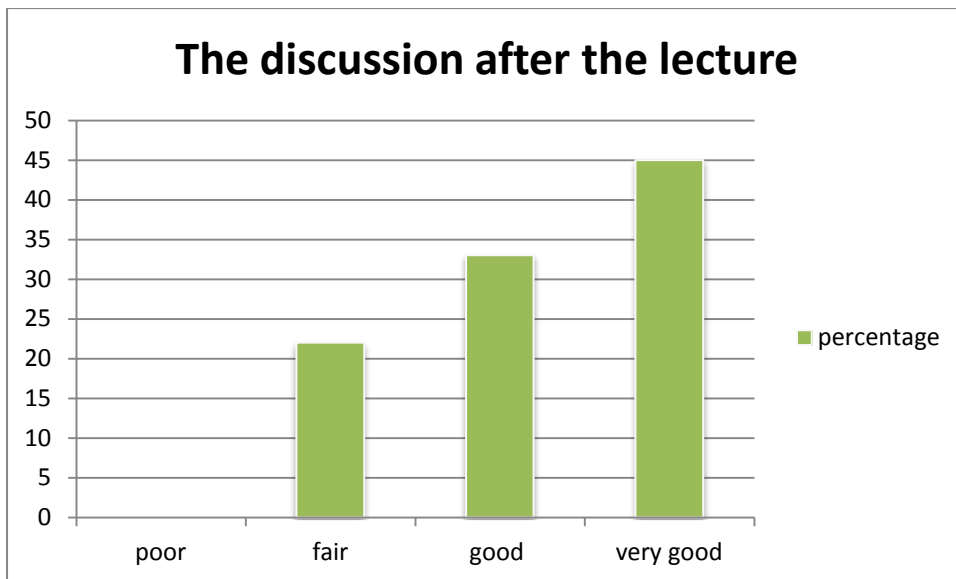

Audience Feedback Survey

Lecture Title: Atrial Fibrillation

Lecturer: Dr. Khidir Osman, MD, FACC

Respondents: 36 (Internal Medicine and Cardiology Registrars)

Summary of comments and suggestions:

- Very updated, informative and precise to the point lecture.
- Very good choice of an important subject.
- Good style of presentation.
- It improved our level of clinical knowledge.
- It is very motivating for us post graduate students to attend such good qualities of lectures.
- It would be great if SAMA organizes more of these lectures on a regular basis and it becomes part of the SMSB training program. Such lectures need to be obligatory to attend!

- We hope if it is possible to organize multiple sessions about each branch e.g. in cardiology: IHD, arrhythmias...etc.
- More sessions about practical procedures e.g. DC cardio version.
- More sessions about emergency medicine.
- We would like to receive the word document of these lectures in our emails on a regular basis.
- More of real cases discussion.
- More advertisement and publicity for SAMA lectures.
- Increase the interactive nature of the lectures.
- We appreciate SAMA`s efforts in coordinating these lectures and we would like to thank SAMA for taking this initiative.
